

Call for papers for a special issue of Restoration Ecology Journal!

“Restoration Ecology and Soil Microbial Communities: Emerging Approaches”

Potential topics include:

- Impacts of ecological restoration on soil microbial communities
- Using soil microbial approaches to aid ecosystem restoration
- Microbial communities as an indicator of resilience/recovery
- Microbial functions and mechanisms related to restoration
- Bacteria, fungus, and biocrust related research welcome!

Perring et al. 2015 Ecosphere

Manuscripts due: prior to August 2019

Issue publication: Early 2020
